I AM... WHO IS...?

Vocabulary Game

INSTRUCTIONS

Created By Mrs. and Mrs. Rooster TpT

GOAL

This is a vocabulary review game designed to help students master vocabulary in a fun way.

PREPARATION

1. Print off two copies of the "I AM... WHO IS...?" Game. One copy will be used for the game. The other copy will be used as your answer key. (If you choose to have your students play individually or in pairs, you will need to print more copies.)
2. For the set used to play the game, print the cards, cut them out, and SHUFFLE them. To use the set multiple times, we suggest printing them on cardstock, cutting them out, and laminating them. When we had neither cardstock nor a laminator available, we printed the cards, cut them out, and glued them to index cards. That worked well too!
3. For the set used as the answer key, do not cut the cards out. The cards are in the correct order for the key.

DIRECTIONS

The game can be played in two different ways: Full class review or individual/partner review.

FULL CLASS REVIEW

1. Distribute one or more cards to each student in class. All of the cards must be passed out for the game to work.
2. Have one student begin the game by standing up and asking the "WHO IS...?" question on their card. (It does not matter which card begins the game. Just follow the answer key and the cards will loop back around.)
3. The student who has the answer to the question gets up and stands next to the first student, then reads both parts of their card "I AM..." and "WHO IS...?"
4. Play continues until all of the cards are read and all students are standing in a circle. If the game was completed correctly, the game will loop back around to the first cardholder with all cards having been used.

INDIVIDUAL OR PARTNER REVIEW

1. Give one set of cards to each student or pair of students. Each student/pair of students will need an entire set of cards for the game to work.
2. Students choose one card to start the game. They can choose any card because the cards will loop back around. However, it may be easiest for you to check their work if they all start with the "I AM Scientific Method" card, as it is the first card on the answer key.
3. Students find the card with the answer to the first card and lay it next to the first card.
4. Play continues until all of the cards are set out in order. If the game was completed correctly, all cards will be used and the answer to the last card will be the "I AM" from the first card they chose.

Instructions

For preparation and both individual and full-class play

Answer Key

I AM... WHO IS...?

Scientific Method Card Game

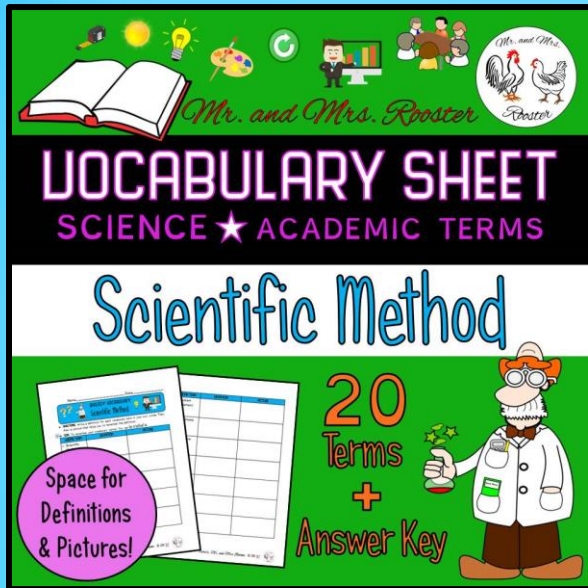

This is the order the terms go in if students start with the "I AM Scientific Method" card. You can begin the game with any card, however, and the game will loop back around. The game ends when students come back to the card that they started with. You can use this sheet to help guide students if they get stuck. Playing the game several times during the unit and giving the students different cards each time will help them to memorize the terms while doing a fun activity!
